

DR ANDREW J. S. DAWOOD
MRD RCS (Eng.) MSc BDS (Lon.)

Andrew devotes his time to dental implant surgery at the Dawood and Tanner dental practice, www.dawoodandtanner.co.uk, and research and development for specialist implant manufacture and in 3D imaging and 3D printing. Andrew also has honorary attachments at University College London, St Bartholomew's and Royal London, The Chelsea and Westminster, and Moorefield's Eye Hospitals, working with implant rehabilitation of patients who have undergone extensive resection or trauma.

Andrew has a number of significant innovations to his name, including the development of an award winning computerised implant drill controller, and various implant designs, including bi-functional and zygomatic implants. Andrew lectures regularly on surgical and prosthodontic aspects of implant dentistry in the UK and internationally, and is published in the scientific literature.

Andrew is also Clinical Director of www.cavendishImaging.com, an independent imaging and medical modelling facility. CBCT scanning, and 3D photography along with 3D printing and surgical planning are used to facilitate all types of surgical implant placements as well as complex surgical procedures. This service is widely used by dentists placing implants, surgical colleagues, and National Health Hospital Trusts.
