EUROPEAN SOCIETY  
FOR COMPOSITE MATERIALS

# PROMOTIONAL OPPORTUNITIES

Dear colleague,

It is a great pleasure to invite you to attend the sixteenth European Conference on Composite Materials (ECCM16) to be held in the monumental city of Seville (Spain) from June 22nd to 26th, 2014.

The conference is organized by the Elasticity and Strength of Materials Group of the University of Seville, under the patronage of the European Society for Composite Materials (ESCM). As you know, ECCM is Europe's leading conference on Composite Materials and, traditionally, hosts scientists, engineers and designers, both from Academia and Industry, coming from all areas of the world.

In view of a complete and proper exploitation of composites, in the different fields of application, the Conference aims to represent a forum for exchanging ideas, presenting the latest developments and trends, proposing new solutions and promoting international collaborations. For this aim we are preparing a comprehensive program which includes plenary and keynote lectures, several symposia on a variety of topics as well as technical workshops on subjects of industrial interest.

To cover the industrial application of the Conference, a visit to the A400M Final Assembly Line, the Airbus aeroplane in service with most composites on it, is also being scheduled.

Special attention is given to the social program to obtain the maximum benefit from the beauty of the city.

I warmly invite you to join us and enjoy ECCM16. Together with all the members of the Scientific and Organising Committees, I look forward to meeting you in Seville.

Sincerely,

Federico París  
Chairman of ECCM16  
Elasticity and Strength of Materials Group  
University of Seville, School of Engineering

# PROMOTIONAL OPPORTUNITIES

The Organising Committee has prepared a comprehensive promotional program, with sponsorship packages suitable for all budgets.

Support for ECCM16 will provide the possibility to tightly connect company name and brand to all participants, the international community of scientific and industry leaders in the field of composites and nanocomposites.

Conference sponsorship will represent an effective way to consolidate existing technical and business relationships and create new ones.

The exhibition space, located in strategic areas of the conference, will provide a further opportunity of communicating brand messages and to present equipments, services and technology to a large number of selected and qualified potential customers.

Online and printed pre-conference advertising will eventually promote sponsor companies to the worldwide composite community.

Promotional packages are illustrated in detail in the next page and may be further modified or tailored on request. Interested companies should contact the conference secretariat.
