

Colletotrichum Workshop 2014, Seville, Spain

9:05 Michael Thon, Welcome

9:10 - Dr. Riccardo Baroncelli, CIALE, Spain -University of Warwick, UK
***Colletotrichum acutatum sensu lato* comparative genomics**

9:30 - Dr. Pamela Gan, RIKEN, Japan
Colletotrichum genomics at RIKEN.

9:50 - Shu-Cheng Chuang, National Chung Hsing University, Taiwan
Genomic and transcriptomic analyses unravel effector repertoire of *C. acutatum* during the infection on *Capsicum annuum*

10.10 - Dr. Noam Alkan, Volcani Center Israel
Simultaneous transcriptome analysis of *C. gloeosporioides* and tomato fruits response at different stages of pathogenicity reveal fruit-fungal arm and defense strategies.

10: 30 – Fumi Fukada, Kyoto Prefectural University, Japan
CoBub2-CoBfa1 complex is required for G1/S phase progression and pathogenesis in *Colletotrichum orbiculare*

10:45 - Sayo Kodama, Kyoto Prefectural University, Japan
***C. orbiculare* CoPag1, a component of MOR pathway, is involved in appressorium development triggered by plant-derived signals**

BREAK (11 to 11:30), Coffee

11:35 - José Sanz–Martín ; CIALE, Universidad de Salamanca, Salamanca, Spain
Functional characterization of a *Colletotrichum graminicola* fungalysin with a role in virulence

11:55 - Dr Dov Prusky, Volcani Center Israel
Ammonia metabolism by fungi: effect on host and fungal responses contributing to pathogenicity of *Colletotrichum*

12:15 - Dr. Marisa Vieira de Queiroz; Universidade Federal de Viçosa, Brazil
Trying to understand the *C. lindemuthianum*-*Phaseolus vulgaris* interaction

12:35 - Dr. Pedro Talhinhos, Centro de Investigação das Ferrugens do Cafeeiro, BioTrop Portugal
The pathogens causing olive anthracnose

12:50 - Andreia Loureiro, Centro de Investigação das Ferrugens do Cafeeiro BioTrop, Portugal
Genetic and genomic contributions for the taxonomy of *C. kahawae*

13:05 - Dr. Juan Moral, CSIC-IAS, Córdoba, Spain
Olive Anthracnose: Biology, Epidemiology and Management

13:30 - Lunch
